Solution Placemaking

We're a family business with 25 years proven durability on Australian roads.

StreetStrong specialise in the application of sustainable pavement systems and coatings to asphalt surfaces, and are proud to be licensed applicators for StreetPrint™, StreetBond™, and DuraTherm™ technologies. Our cost-effective and durable surfaces are so strong they require minimum maintenance and are designed to last the test of time.

Why we're different.

We're reducing the Urban Island Heat Effect with sustainable, cost effective, long term solutions.

Client Northern Beaches Council
Product StreetPrint™
Solution Traffic Calming

Why StreetPrint™?

StreetPrint™ is a patented decorative asphalt paving system that imprints specialised asphalt stamps onto a heated asphalt surface. This system creates a durable, cost-effective, and aesthetically pleasing alternative to traditional brick or stone paving.

The StreetPrint™ process heats and imprints asphalt using a StreetHeat® machine at 170°. Ideal for outdoor paving to create realistic and long-lasting brick, slate, stone and other enhanced effects.

Client Inner West Council
Product DuraTherm™
Solution Traffic Calming

Why DuraTherm™?

DuraTherm™ is a decorative asphalt surfacing system designed specifically for high-traffic areas. Its thermoplastic material is inlaid into imprinted asphalt and installed flush with the surface, making it highly resistant to wear from traffic. Unlike traditional street print methods, DuraTherm™ pavement integrates seamlessly with asphalt, ensuring exceptional durability. The result is a bold, eye catching patterned asphalt surface that withstands heavy use while enhancing pedestrian safety and urban appeal.

Why StreetBond™?

StreetBond™ is a premium coloured asphalt coating that rejuvenates and enhances urban surfaces. Engineered with cutting-edge polymer, cement, and epoxy technologies, this high-performance StreetBond™ coating is designed to withstand varying weather conditions and heavy traffic loads. Its anti-slip properties make it an excellent choice for high-footfall areas, ensuring pedestrian safety while delivering a striking aesthetic.

Introducing Australia's first Photoluminescent Markings

Why LuminoKrom?

Originating in France, LuminoKrom paint has proven resistance; five years after it was installed on a bicycle lane in Pessac, France, the results show that the lighting process is perfectly stable. Night after night, the path markings light up, whatever the weather, whatever the season.

Why TrafficPatternsXD?

TRAFFICPATTERNSXD® is preformed thermoplastic crosswalks and traffic-calming surfaces for asphalt and is an extremely durable material that incorporates a unique aggregate-reinforced formula with enhanced wear resistance. The result is a traffic-tough, long-lasting crosswalk with a traditional, brick-like aesthetic.
